PROFILE

Aspiring Java Full Stack Developer with a strong foundation in Core Java, C, and C++. Currently specializing in backend development using JDBC, Servlets, and MySQL, while actively expanding expertise into Frontend technologies. Passionate about building scalable applications and solving complex problems, with a unique blend of technical skills and business logic from an MBA background.

SKILLS

Programming Languages: C, C++, Java

Backend: Core Java, JDBC, Servlets

Frontend: Java Swing (Desktop GUI)

Database: MySQL

Tools: GitHub, VS Code, Eclipse, Apache Tomcat

PROJECT

Cafe Management System - A desktop application to automate cafe operations.

Technologies Used: Java (Core & Swing), MySQL, JDBC, XAMPP

Admin Page: Manage food items (add/delete), view customer details, monitor income reports (daily/weekly/monthly)

User Page: Search items, add to cart, calculate bill, make payments, generate printable bills

Purpose: Simplifies café management and provides a smooth ordering and billing experience
